Controls and Automation

- Software to Maximize Efficiency and Minimize Downtime
- Automated Management allows Comprehensive Facility Control
- Equipment Monitoring for Improved Maintenance and Safety

Automated Controls from CAS Electrical Automation and Controls group allows for comprehensive control at your fingertips, no matter the size or layout of your facilities. Customization of all functionality and screens allows your system to look and operate how you want it to, whether in automatic or manual modes. It can also be easily modified to accommodate future changes to the facilities.

FLEXIBILITY

- Will Interact with New and Existing Hazard Monitoring Systems
- In House Tech Support Staff
- We Write the Software and Install all the Equipment
- Custom Screen Design Based on Your Site
- Integration with Multiple Equipment Types
- Remote Support and Monitoring
- UL Listed Panel Shop
- We Work on New and Existing Systems Across Multiple Platforms
