

DRYER CONTROLLER

# UPGRADE YOUR DRYER TO A SMART DRYER

## PC CONTROL

Control Room PC allows the operator full control of the dryer. Along with advanced diagnostics, Data Acquisition, and on board guides.

## HMI AT DRYER

HMI Mounted at the dryer allows for full control and startup. With troubleshooting and diagnostic capabilities.

## MOBILE CONTROL

Mobile Control from any Android or Apple device with an internet connection. Giving the Operator full monitoring and control capabilities remotely.

DRYER CONTROLLER

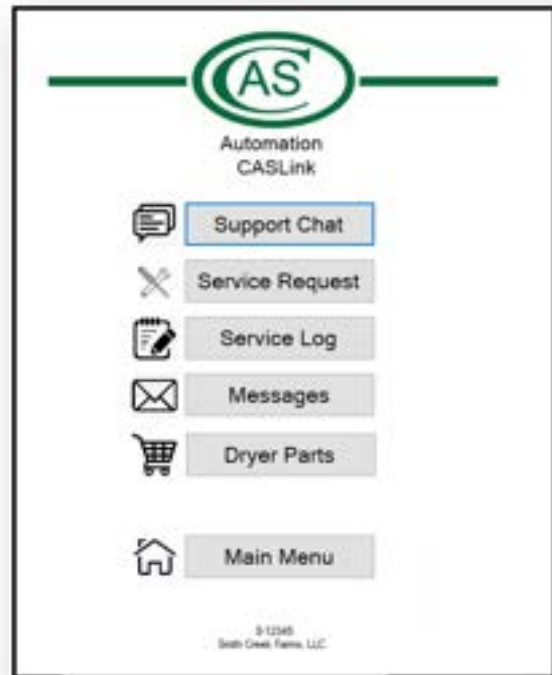

# UPGRADE YOUR DRYER TO A SMART DRYER

- Integrated DryerMaster Moisture Control
- SMS Text Alerts
- Advanced Data Collection
- Temp+ Automatic Control
- Pause/Resume Function
- Warmup/Cool-Down Feature
- On Screen Diagnostics
- Bin Inventory Management
- Knowledge Based Search Function
- On Board Manual and Guide
- CASLink Remote Support and Service

## CASLink remote support bridges the gap between the customer and technicians

- Built in Support Chat function allows the user to instantly connect with a technician.
- Service Requests allow the operator to schedule a service call.
- Service log gives technicians the ability to see maintenance and repair history.
- Message function allows CAS to relay information to the operators regarding feature updates, service information etc.
- Integrated Dryer Parts menu allows the operator to instantly order parts.
