PLC PROGRAMMER TECHNICIAN

Position available for an individual that would be responsible for PLC programming, Variable Frequency Drive, motor control wiring and troubleshooting. The ideal candidate would be a self-starter, reliable, and have at least 2 years' experience in PLC programming and industrial controls, and/or degree in electrical engineering or certification in PLC programming. Alternatively, an ambitious self-starter with a background in computers, networking and electronics; with a strong desire to learn and adapt to new challenges. Candidates must be capable of spending large amounts of time designing and programming, panel building/wiring, field installation/wiring and adapting quickly across job functions and responsibilities.

Will be responsible for directing assembly of control panels and components to be installed in field operations.

PLC Programming experience preferred but not required. Must be able to learn programming for Allen Bradley as well as other PLC manufacturers such as IDEC, Automation Direct, ETC.
